- 1 Marconi's first commercial transatlantic wireless telegraph station was located in Clifden
- 2 The Menlo Park founders in Silicon Valley named it after Menlo [Castle] in their native Galway
- 3 Former Uni of Galway physics prof George Johnstone Stoney coined the term "electron"
- 4 The Anderson bridge circuit by former president Alexander Anderson is an IEEE Milestone
- 5 German prof Emily Anderson, WW2 cryptanalyst, decoded the letters of Beethoven/Mozart
- 6 Zachary Quinto (Spock/Kelvin timeline) was a waiter at Java's Crêperie & Café Français 🙌
- 7 Jim Thornton (father was from An Spidéal) created the CDC 6600 supercomputer with Cray
- 8 Claddagh, birthplace of the Claddagh ring (love, friendship, loyalty) and Angel from Buffy 🧛

- 7 Jim Thornton (father was from An Spidéal) created the CDC 6600 supercomputer with Cray
- 8 Claddagh, birthplace of the Claddagh ring (love, friendship, loyalty) and Angel from Buffy 🧛

Instructions

- Use *Schoolbell Bold* font (used free Woodcutter Simple font on original maps)
- From menu, choose View -> Snap to -> Grid...
- ...and Tools -> Preferences -> Use measurement unit preferences -> Pixels
- Go to a LinkedIn company page, right click on logo, choose “Copy Image”
 - These should be 200x200px, so if you find a logo elsewhere, try and resize it to 200x200px
- Paste the logo image into the slide
- Resize the image to 24x24px (using “Format options” in Google Slides)
- From the toolbar buttons, choose Crop image -> Shapes -> Oval
- Copy a caption from another company, *Schoolbell bold* font, size 6pt
 - Captions are 40x16px, centred under image
- If there are two words that won't fit in the above, make caption 40x24px
- If text is too wide, use a 56x16px or 56x24px caption, centred under image
 - Minor issues exporting to PDF or PNG, usually if a company name is too long, in which case just make that caption into one of the wide captions and that seems to export okay
- Hyperlink the image and the caption to their LinkedIn page
- Download as a PDF and convert to a 3508x4961px PNG for A3 printing
